## Supplementary Prospectus

Marathon Resources Limited  
ACN 107 531 822

This Supplementary Prospectus must be read  
with the Prospectus issued by Marathon  
Resources Limited dated 20 October 2004

### Important information

This Supplementary Prospectus is dated 19 January 2005 and is supplementary to the Prospectus dated 20 October 2004 issued by Marathon Resources Limited ACN 107 531 822 for an Offer of up to 25,000,000 Shares at 20 cents each to raise up to \$5,000,000.

This Supplementary Prospectus was lodged with ASIC on 19 January 2005. Neither ASIC nor ASX take any responsibility for the contents of this Supplementary Prospectus.

This Supplementary Prospectus must be read together with the Prospectus. If there is a conflict between the Prospectus and this Supplementary Prospectus, this Supplementary Prospectus will prevail. Terms and abbreviations defined in the Prospectus have the same meaning in this Supplementary Prospectus.

New applications for Shares may only be made on an Application Form that is attached to or accompanies this Supplementary Prospectus.

This document is important and should be read in its entirety. Please consult your legal, financial or other professional adviser if you do not fully understand the contents.

Section 724(1) of the Corporations Act (the Act) sets out the choices open to a person making an offer, if the disclosure document conditions are not met or new circumstances have arisen in respect of the offer.

Pursuant to Section 724(2) of the Act the person must inter alia give applicants a supplementary prospectus that corrects the deficiency or changes the terms of the offer; and one month to withdraw the application and be repaid the money received from the applicant.

### Marathon

- has identified savings in its program to enable a reduced minimum subscription;
- has further information in respect of Uranium on its MtGee tenement; and
- seeks additional time to raise its minimum subscription and minimum number of securities.

### Effect of Supplementary Prospectus

The effect of the Supplementary Prospectus is that the minimum subscription sought by Marathon is reduced to \$2.4 million, and the time period for Marathon to reach its minimum subscription and number of securities and for approval for quotation of the Shares by ASX recommence from the date of this Supplementary Prospectus.

This means that:

- a) Marathon has an additional 3 months from 20 January 2005 to raise its minimum subscription of \$2.4 million. (It should be noted, however, that the minimum subscription must be raised before approval for quotation of the Shares on ASX can occur.); and
- b) Marathon has an additional 3 months from 20 January 2005 for Shares the subject of the Offer to be approved for quotation by ASX; and
- c) Marathon must give Applicants under the Prospectus who have lodged Applications prior to the date of this Supplementary Prospectus:
  - i) a copy of this Supplementary Prospectus; and
  - ii) the right for a period of 1 month from the date of this Supplementary Prospectus, to withdraw their Applications.

Applicants will not have a further opportunity to withdraw their accepted Applications on the basis that Marathon has not met the minimum subscription condition or that the Shares have not been admitted for quotation by ASX for up to another three months.

### Changes to Prospectus

The modifications result in changes to the following sections of the Prospectus:

- a) The Opening Date and Closing Date in the Important Note and Disclaimer section of the Prospectus (page 2);
- b) The Important Dates in the Company Highlights section of the Prospectus (page 4).
- c) To include the following information on Mt Gee in the Investment Summary (Adelaide Geosyncline) section of the Prospectus (page 8)
  - i) Further examination of previous drill hole data revealed that the resource at Mt Gee comprised 5.330 Mt @ 1.0kg/t (Exoil Ltd Final Report on Special Mining Lease 413 of July 1972, PIRSA envelope 3633). As well as large tonnages of low grade uranium ore at Mt Painter East, CRA drilling included some impressive cross sections of ore at depth, for example 65 metres at an average grade of 1.3kg/t including 8 metres @ 3.3kg/t (reference CRA hole DD91GE33).
  - ii) The Company has received a number of expressions of interest in its uranium resources in the Mt Gee tenement, including an offer (subject to normal due diligence) from a listed Canadian entity to either acquire the tenement in exchange for the issue to Marathon of 1 million shares in the entity or to spend \$1 million over 3 years to acquire a 60% interest in the tenement.
  - iii) Uranium is a resource that has experienced a large increase in price recently. The Company intends to pursue negotiations for a partial sale or joint venture, on the best available terms, with a party experienced in uranium exploration and development.

- d) The exploration budget in the Exploration Program section of the Prospectus (pages 30-33) (Annexed pages 6-8) has been modified to note;
- i) With the passage of time since preparation of the Prospectus, certain works have been completed by the Company on its tenements, allowing the Company to reduce its exploration budget by approximately \$100,000
  - ii) The balance of the exploration program and budget has been reviewed and the Company has reduced its expenditure by a further approximately \$300,000
  - iii) The new exploration program and budget provides for a total expenditure of \$1,614,500
- e) The use of funds in the Exploration Program section of the Prospectus (page 31) (Annexed) has been modified to note;
- i) The cost of capital raising has been re-estimated at \$200,000
